Photo Screenprinting Materials list

We have screens available, but it is always nice to have your own - you can decide once the class starts.

- Screens are available at Blick, and I recommend a size 12"x18" or 16"x20": a 12"x18" screen will give you a 9"x14" image size to work with, and a 16" x 18" screen will give you a 12"x15" image size to work with.

We also have a random assortment of inks to work with.

- If you have a particular project in mind, please purchase Aerotex Water-based ink by Union Ink.
- If you are going to use fabric, be sure to get some catalyst as well, although we may have some of it laying around from previous classes.

Also bring:

1. an image drawn on paper; limit use of photographs unless they have been bitmapped
2. sharpie
3. blue tape
4. images that you are interested in seeing printed as a screenprint

We have all the other supplies. 😊
