Polyester Plate Lithography Material List

What types of images will work best to make into beautiful prints?

DRAWINGS: This process is made for drawing! Feel free to bring in line drawings from your sketchbook or draw directly onto the polyester plate. We will experiment with markers, ballpoint pens and ink-wash.

PHOTOS: When it comes to photographs, the higher contrast the better, this adjustment can be made on any computer image application. Also, please make sure the image is in black and white and not larger than about 6X8 inches.

REMEMBER: whatever you print will be the reverse of the original image.

Students provide

- Drawings and photographs for inspiration and printing
- Pencils, pens, other favorite drawing tools
- Additional printing paper

MAC provides

- Some drawing tools
- Stonehenge printmaking paper
