

Zine Workshop

Materials List

Nate Orton

This intro to self-publishing will be a whirlwind class, as we will employ many printing techniques in a small amount of time. If you are interested in printing a woodblock, it might help to show up with an **EZ-cut rubber block** to help you quickly cut and print, or consider showing up to class with a **wood or rubber block already carved and ready to print**.

Other than the woodblock component, I encourage you to show up with **lots of writings, drawings, photos, muses, etc.** For printing and book making I will be supplying a large amount of papers to print on but you are also **encouraged to bring your own papers**.
