

### Chine Collé with Drypoint

(2) sheets 22" x 30" Stonehenge white printmaking paper per student provided

(2) 5" x 7" x 1/16" thick plexi plates per student provided

Some drypoint tools are available for use at Trayle Studio only. Students may also use their own drypoint needle, scribe, awl, sharp dental tool, etc. Inexpensive is fine.

Photos or drawings for inspiration are recommended, or you may choose to work freehand. The image on the plate will print in reverse - so if direction is important, flip photos at home before printing.
